ABSTRACT

This report describes the World Trade Organization (WTO) Agreement on Technical Barriers to Trade (TBT Agreement) activities conducted by the National Institute of Standards and Technology (NIST), for calendar year 1995. NIST received and processed 378 notifications of proposed technical regulations; reported 29 proposed U.S. technical regulations to the WTO Secretariat; responded to 329 inquiries for notification information; participated in various bilateral and multilateral standards-related trade discussions; and responded to inquiries on the existence, source and availability of standards and standards-related information. In 1995, NIST also served as the U.S. inquiry point under the Agreement on the Application of Sanitary and Phytosanitary Measures (SPS Agreement).

Key Words: conformity assessment information; notifications; proposed foreign regulations; SPS Agreement; standards information; TBT Agreement; technical assistance; WTO

INTRODUCTION

Uruguay Round Negotiations

In 1995, the results of the second round of trade negotiations, called the Uruguay Round of Multilateral Trade Negotiations, were implemented. A revised Standards Code and a new institution as successor to the General Agreement on Tariffs and Trade (GATT) were established. The revised Standards Code, which maintained the same title - Agreement on Technical Barriers to Trade - is now known as the TBT Agreement. On January 1, 1996 the GATT was replaced by the World Trade Organization (WTO). The U.S. Trade Agreements Act of 1979 was revised in 1995 to implement the new TBT Agreement in the United States.

Unlike the previous GATT obligations, under which countries could select the agreements in which they participated, the WTO requires automatic adherence to the principles of all the WTO agreements.

1995 Activities

As of December 31, 1995, there were 112 WTO members (see Table I). The National Center for Standards and Certification Information (NCSCI), within the Office of Standards Services, is responsible for many provisions which relate to the establishment of a U.S. inquiry point,¹ a standards information center, and other non-agricultural standards activities. Sixty-one WTO members had established inquiry points in 1995. For the most part, this report summarizes TBT Agreement activities conducted by NCSCI during calendar year 1995.

On November 7, 1995 a special meeting on procedures for information exchange was held in Geneva, Switzerland to facilitate implementation of the TBT Agreement by members. Fifty-two WTO members were represented, some of them from national inquiry points. The meeting provided a forum for discussing notification procedures, document exchange and technical assistance to developing countries.

INQUIRY POINT

In 1995, NCSCI also served as the U.S. inquiry point under the Agreement on the Application of Sanitary and Phytosanitary Measures (SPS Agreement). Center staff worked closely with the Foreign Agricultural Service of the U.S. Department of Agriculture (USDA) to fulfill obligations related to notifying proposed U.S. SPS-related technical regulations and responding

¹ The TBT Agreement requires each WTO Member to establish an inquiry point to answer all requests for information about technical regulations, standards, and rules of conformity assessment.

to requests for copies of the regulations. Detailed information on SPS-related notifications and activities discussed in this report may be obtained directly from:

Notifications

WTO members are required to notify the WTO Secretariat of all proposed government regulations and conformity assessment procedures that might significantly affect international trade. The Secretariat, in turn, disseminates the notifications to all other members. As the official U.S. WTO/TBT inquiry point for information on standards and conformity assessment activities, NCSCI notifies the Secretariat of proposed U.S. Federal Government rules that might significantly affect trade. NCSCI also receives foreign notifications through the WTO Secretariat and disseminates them, along with supplementary information, to appropriate U.S. companies and industry groups. NCSCI responds to inquiries about foreign and U.S. notifications, provides copies of the proposed regulations, and arranges for fee-supported translations of foreign standards. Center staff also assist in developing comments on the impact on U.S. industry of proposed foreign regulations and transmits them to the foreign government concerned.

In 1995 the WTO Secretariat issued 378 TBT-related notifications and 191 SPS-related notifications. Under the TBT Agreement, twenty-six WTO members each reported at least one proposed regulation (see Table II.) Japan had the most notifications (48). Thirteen other signatories - Australia, Belgium, Canada, Czech Republic, Denmark, EC², India, Korea, Mexico, Netherlands, Slovak Republic, Switzerland, and the United States - each reported 10 or more proposed regulations. Under the SPS Agreement, nineteen WTO members each reported at least once proposed regulation.

An official in the Office of the U.S. Trade Representative (USTR) in Geneva receives notifications from the WTO Secretariat and transmits them directly to the United States. The TBT notifications, all of which are available in English, include the name of the country proposing the regulation; the assigned Goods/Technical Barriers to Trade/Notification (G/TBT/Notif.) number; a brief description of the regulation; and the final date for comments

² The European Community (EC) has retained this name, rather than the European Union, concerning the WTO.

(see Appendix A). The SPS notifications, which are also in English, include similar information and have the assigned Goods/Sanitary and Phytosanitary/Notification (G/SPS/N/) number. The SPS notifications include the country code in the designation number (e.g., JPN for Japan) (see also Appendix A).

In order to provide wide access to this information in the United States, all foreign notifications are published in the Commerce Business Daily and several other U.S. publications. NCSCI maintains a computerized database on all TBT notifications and a telephone GATT/WTO hotline where up-to-date notification information can be obtained. The hotline number is (301) 975-4041. USDA disseminates the SPS notifications through a newsletter and targeted mailings.

Proposed U.S. Regulations

All proposed U.S. Government rules (mandatory standards or conformity assessment systems), including proposed revisions, are published in the Federal Register by the responsible Federal agency. Center staff regularly review the Register to identify those proposed regulations that may potentially affect trade and therefore should be notified to the WTO Secretariat. Notices of these proposals are sent directly to the WTO Secretariat via fax.

A new provision of the TBT Agreement requires that members also notify proposed local government regulations which might affect trade. In 1995, NCSCI contracted with a private company to review the journals/gazettes of 21 states³ to identify proposed technical regulations. No such proposals were identified in 1995.

In 1995, twenty-nine proposed U.S. TBT-related regulations were reported covering such subjects as food additives, respiratory devices, upholstered furniture, meat and poultry products, and motor vehicles. The originating agencies for the TBT regulations are shown below. (See Table III for listing of specific products by agency.)

<u>Agency</u>	<u>No. of Notifs.</u>
Bureau of Alcohol, Tobacco & Firearms (BATF)	2
Consumer Product Safety Commission (CPSC)	1
Dept. of Energy (DOE)	2
Dept. of Transportation (DOT)	1
Environmental Protection Agency (EPA)	1
Food & Drug Administration (FDA)	7

³The states are Alabama, California, Connecticut, Florida, Indiana, Kentucky, Louisiana, Maryland, Michigan, Minnesota, Missouri, New Jersey, New York, North Carolina, Oregon, Pennsylvania, South Carolina, Tennessee, Texas, Virginia and New Jersey.

Federal Trade Commission (FTC)	2
National Highway Traffic Safety Admin. (NHTSA)	6
Dept. of the Treasury (TREAS)	2
U.S. Dept. of Agriculture (USDA)	<u>5</u>
Total	29

Eighteen SPS-related proposed U.S. regulations were reported from the following agencies: Environmental Protection Agency (11), Food and Drug Administration (2), and Department of Agriculture (5).

Proposed Foreign Regulations

The WTO Secretariat in 1995 issued 349 TBT notifications from countries other than the United States (see Table IV.) The foreign regulations covered a wide variety of products, including drugs, chain saws, sea fish products, terminal equipment, chemicals and motor vehicles. A subject listing of foreign TBT notifications is contained in Appendix B. Switzerland did not join the WTO until July of 1995 and continued to issued notifications under the existing GATT system; the notification numbers including a "t" were issued before July.

NCSCI regularly sends foreign notifications to groups and individuals to serve their information needs and to allow them to disseminate this information to others. The Center also sends copies of all foreign notifications to the American National Standards Institute for publication in its biweekly Standards Action.

Inquiries

NCSCI responded to 280 domestic and foreign written and telephone requests for TBT notification information (271 U.S., 9 foreign) in 1995. Many requestors asked for copies of more than one regulation. In addition, a number of requestors asked for general information on the TBT Agreement. NCSCI responds to such requests by sending an information package consisting of the latest issue of: its newsletter, TBT News; a list of recent foreign notifications; brochures describing the TBT Agreement; and ordering information for the Commerce Business Daily. Forty-nine requests (48 foreign, 1 U.S.) were received for SPS-related notifications.

In 1995, the most often requested regulations concerned telecommunications equipment, textile products, consumer goods, environmental packaging, and electrical appliances. From January 1 until June 5, 233 individuals called the GATT/WTO hotline for up-to-date information on foreign notifications. Due to equipment change, hotline calls are no longer counted.

Inquiries are received from a variety of companies and organizations, such as Airwave Rules and Regulations, Eastman Kodak Co., General Motors Corp., W.L. Gore & Assoc., and the

Harley Davidson Co. The Center also receives requests from individuals serving as consultants or obtaining information for their own use. The types of requests vary as widely as the products subject to notification. Some companies are interested in certain subject or product areas (e.g., telecommunications, motor vehicles, environmental issues); others are interested in specific countries (e.g., Canada, Mexico, EC, Sweden and Japan). The information is used by these groups as: 1) an alert system of proposals of interest to them; 2) a mechanism to review a proposal to ascertain its trade impact; 3) an opportunity to comment on a document; and 4) a method for verifying information received from subsidiaries or agents in a foreign country.

Translations

Upon request, NCSCI will ask for the text of the proposed foreign regulations which are subject to notification. WTO members are required to supply copies of the regulations through their inquiry points. Of the 127 TBT-related regulations requested and received in 1995, 42 were in languages other than English. NCSCI coordinates a service to obtain, on request, an English translation of any proposed regulation in a foreign language. The cost of translation is paid by the requestor; if more than one request is received for the same translation, the cost is divided equally among requestors. The cost of a translation is determined by the number of words contained in the document and the price per 1,000 words charged by the contractor. In 1995, the Center coordinated the translation of five foreign documents.

Comment Handling

A major objective of the TBT Agreement is to allow exporters, government agencies, and other interested parties to comment on proposed foreign regulations which they believe would impede exports. NCSCI provides the text of proposed foreign regulations upon request and encourages the submission of comments if a regulation appears to create trade barriers. Industry representatives often become aware of proposed regulations through contacts with their foreign counterparts or subsidiaries, and are able to provide informal comments directly to the relevant country.

NCSCI has procedures to transmit comments, upon request, from U.S. organizations to appropriate foreign governments and coordinates any follow-up activity. In 1995, the Center received and processed formal comments from U.S. industry and government agencies on one EC proposed regulation concerning bottled water (G/TBT/Notif. 94.486). Industries are free to comment directly to the foreign ministry responsible for the regulation and often do.

The Center also handles comments from foreign countries on proposed U.S. technical regulations reported to the WTO Secretariat. NCSCI staff forward comments to the appropriate U.S. Federal government agency for their consideration. In 1995, comments were received from the EC on proposed TBT-related U.S. regulations concerning vitamins (95.64-

FDA), cheese products (SPS/US 12-FDA), and distilled spirits, wines and malts (95.292-BATF).

Comment Periods

To allow WTO members adequate time to receive the text of a regulation (and to have it translated, if necessary), review it, and prepare comments, the TBT Agreement recommends a comment period of at least 60 days. If the comment period is insufficient (e.g., due to late receipt of an English version or complicated technical issues), NCSCI staff will request that the issuing country extend the comment period. In 1995 Center staff received 29 requests from other members requesting extensions of the comment period for proposed U.S. technical regulations. In most cases, no formal extensions of the comment periods were made. Most U.S. regulatory agencies and foreign ministries will, however, accept comments if received within a reasonable time after the final date for comments.

The average length of the comment period⁴ in 1995 was 45 days for U.S. TBT regulations and 44 days for foreign regulations. The average length of the comment period allowed by U.S. agencies is as follows:

BATF	62 days	FDA	62 days
CPSC	62 days	FTC	6 days
DOE	100 days	NHTSA	37 days
DOT	17 days	TREAS	26 days
EPA	20 days	USDA	32 days

Comment periods for foreign regulations ranged from none at all to 129 days. The average number of days for comment period by country was: Australia, 31; Belgium, 0; Canada, 40; Czech Republic, 43; Denmark, 80; EC, 57; El Salvador, 16; Finland, 58; France, 68; Germany, 28; Hong Kong, 40; India, 5; Japan, 57; Korea, 21; Malaysia, 0; Mexico, 39; Netherlands, 49; New Zealand, 52; Norway, 33; Singapore, 13; Slovak Republic, 53; Spain, 59; Sweden, 64; Switzerland, 46; and Thailand, 19.

STANDARDS INFORMATION

NCSCI is the focal point in the United States for standards-related information. The Center, established in 1965 and mandated by the Trade Agreements Act of 1979, provides government, industry, and the general public with information on standards, technical regulations, conformity assessment procedures, and related activities that affect trade and commerce.

⁴ Number of calendar days between the date the notification was issued by the WTO Secretariat and the closing date for comments.

NCSCI maintains a microform, CD-ROM and/or hard copy collection of engineering standards and specifications, test methods, regulations, certification rules, directories, reference books, and special publications. In 1995, NCSCI staff responded to requests from all over the world on the existence, source, and availability of standards and related documents. NCSCI also responds to trade-related queries regarding regulations or other requirements imposed by foreign countries that affect the export of U.S. manufactured products.

In July, NCSCI hosted a training seminar on standards information sponsored in cooperation with the International Organization for Standardization (ISO) for Caribbean countries. The seminar covered the establishment of a national standards information center and responsibilities of WTO inquiry points.

In the related area of the EC Single Internal Market, NCSCI maintains an EC hotline to report on draft CEN and CENELEC standards which may affect trade. The recorded hotline - (301) 921-4164 - is updated weekly and provides the subject/product areas, document number, and final date for comments. A total of 245 calls were received on the hotline between January and August. On September 1 new equipment, which does not have a call counter, was installed.

RELATED PROGRAMS

The Office of Standards Services (OSS) provides technical support on non-agricultural standards-related issues. Office functions include: a) participation in standards-related conferences; b) technical assistance to the International Trade Administration of the Department of Commerce and the Office of the U.S. Trade Representative in developing proposals to enhance the TBT Agreement; and c) preparation of special reports on standards issues. 1995 activities included:

- continued participation by office staff in meetings of the Committee on Standards Related Measures to oversee implementation of the standards obligations under the North American Free Trade Agreement (NAFTA);
- participation in negotiations for the accession of Chile into the NAFTA; the Asia-Pacific Economic Cooperation (APEC) standards and conformance subcommittee; and the Free Trade Area of the Americas (FTAA) working group on standards and technical barriers to trade;
- provided guidance to NIST standards experts assigned to foreign countries (Argentina, Belgium (European Union), India, Japan, Mexico, and Saudi Arabia) and support to training programs of foreign groups (Mexico, India and Russia) from various industry sectors;
- numerous presentations and speeches made by technical office staff regarding standards and international activities; and

- provided NIST liaison with the Industry Functional Advisory Committee on standards, which advises the government on standards-related policy issues.

CONCLUSION

NCSCI continues to work with U.S. industry to address standards-related trade questions and concerns to assure wide distribution of relevant notifications of proposed foreign regulations which might affect trade. Requests for further information, suggestions on how the service might be made more useful, or comments on subjects covered in this report should be directed to:

National Center for Standards and Certification Information

Committee on Technical Barriers to Trade

NOTIFICATION

The following notification is being circulated in accordance with Article 10.6.

1.	Member to Agreement notifying: <u>AUSTRALIA</u> If applicable, name of local government involved (Articles 3.2 and 7.2):
2.	Agency responsible: Spectrum Management Agency P.O. Box 78 Belconnen ACT 2616
3.	Notified under Article 2.9.2 [X], 2.10.1 [], 5.6.2 [], 5.7.1 [], other:
4.	Products covered (HS or CCCN where applicable, otherwise national tariff heading. ICS numbers may be provided in addition, where applicable): Provides minimum requirements for emergency position indicating radio beacons (EPIRBs) including those designed for use as personal EPIRBs operating with carrier frequencies of 121.5 and 243 MHz
5.	Title and number of pages of the notified document: AS/NZS 4330:1995 121.5 and 243 MHz Emergency Position Indicating Radio Beacons (EPIRBs) Including Personal EPIRBs (available in English, 30 pages)
6.	Description of content: Applies to a safety of life at sea device that when activated can be used to locate maritime personnel in distress at sea, by direction finders and satellites.
7.	Objective and rationale: This standard is intended for use by equipment designers, manufacturers and suppliers to ensure correct operation of the EPIRBs and their compatibility with space satellite systems.
8.	Relevant documents: The Radiocommunications Act 1992
9.	Proposed date of adoption and entry into force: 1 January 1996
10.	Final date for comments:
11.	Texts available from: National enquiry point [X] or address and telefax number of other body:

Committee on Sanitary and Phytosanitary Measures

NOTIFICATION

1.	Member to Agreement notifying: <u>EUROPEAN COMMUNITY</u> If applicable, name of local government involved:
2.	Agency responsible: European Commission - Directorate General for Agriculture and Rural Development
3.	Products covered (tariff item number(s) as specified in national schedules deposited with the WTO. ICS numbers may be provided in addition, where applicable): CN Code 0511 9980 Other (embryos and ova of equines)
4.	Title and number of pages of the notified document: Draft Commission Decision on animal health requirements and veterinary certification for imports into the Community of ova and embryos of the equine species (7 pages).
5.	Description of content: Introduces animal health rules and veterinary certification to accompany import into the EC of ova and embryos of the equine species.
6.	Objective and rationale: Animal health
7.	An international standard, guideline or recommendation does not exist []. If an international standard, guideline or recommendation exists, whenever possible, identify deviations: International standards in respect of freedom from diseases appearing on Lists A and B of the OIE are reflected in the certification.
8.	Relevant documents: VI/1554/93 rev 4. Will be published in the Official Journal of the European Communities when adopted.
9.	Proposed date of adoption and entry into force: Adoption in November 1995, and entry into force on 2 February 1996
10.	Final date for comments: 31 October 1995
11.	Texts available from: European Community enquiry point [X] or address and telefax number of other body:
